Update Resource Statuses

Introduction
A resource is an entity that reports a status. These can be facilities, organizations, and agencies that report information on medical capabilities, services, supplies, and much more. A sub-resource is subordinate to a resource, and it also reports a status. A sub-resource to a facility could be a generator or contact.

When a change occurs at your location, you or another authorized individual should update your resource’s status in EMResource. This ensures other users at your location and in your region have the most up-to-date resource information.
